

Introducing...

YOUR SHIELD AGAINST MICROBES

Roberts Consolidated Industries introduces GoldGuard™ Antimicrobial Technology. GoldGuard offers a two-tier antimicrobial product protection system for adhesives in both the wet and dry state to inhibit the growth of mold, mildew and odor causing bacteria. Bacteria and fungi are constantly present in our everyday environment and can quickly taint adhesives.

GoldGuard's first tier of protection inhibits the growth of micro-organisms to prevent an attack on the wet adhesive while it is still in the pail. These everyday micro-organisms can rapidly multiply if they obtain utilizable nutrients and have favorable environmental conditions, including an adequate water supply which could cause adhesives to spoil and become unusable.

The second tier of the GoldGuard protection guards against the micro-organisms long after the flooring is laid and the adhesive is in the dried film state. A whole host of micro-organisms including bacteria, fungi and algae can create havoc with the adhesive especially in a humid environment. Moisture sources - such as high humidity, spills and leaks - should be remedied quickly, but in the meantime, GoldGuard's Antimicrobial Technology protection will be working to inhibit the growth of mold, mildew, odor and stain causing micro-organisms.

Look for the GoldGuard logo on our premium products.

Carpet Seam Adhesive and Accessories: 8015
Carpet Pad Adhesive: 4002
Carpet Tile Adhesive: 2077
Wall Base Adhesive: 7200, 7032
Indoor/Outdoor Carpet Adhesive: 6700
Sheetgood/VCT Adhesives: 2001, 2057
Wood Adhesives: 1404, 1407
Carpet & Sheet Vinyl Adhesives: 3000, 3085, 3095,
MAX 3200, MAX 3300, 3500, 3900

To prevent mold, all moisture sources must be eliminated.
